

WOODSIDE JOINERY

Introduction

Woodside Joinery is a family business that has a long tradition specialising in the creation of high quality bespoke staircases and staircase furniture.

Our staircases are designed, handcrafted and fitted by some of the country's finest craftsmen.

We combine knowledge, skill and passion to create staircases that will become the focal point of your home.

We operate throughout the UK and can provide a complete joinery service to include internal doors, linings, architrave and skirting. All of these are available in a number of finishes, for a tailor made, and truly stylish approach to home design.

Knowledge, skill & passion

When designing your home, you want features of character. And what better architectural feature than a staircase? From grand sweeping styles to minimalist spirals, your staircase will become the focal point of your home.

We recognise that every staircase design is unique and so from the outset we pride ourselves on the exceptional care and attention to detail we offer to customers who want the very best.

As part of our service, we are able to provide you with a complete bespoke package, taking you from the design stage, through to manufacturing, fitting and polishing. At all times offering you the knowledge and reassurance that only decades of experience can provide.

We can help make your dreams a reality by interpreting your desires, and are able to provide a free quotation from your drawings. A CAD (computer aided design) 3D image of the final creation is produced, enabling you to visualise how your specified design will look in your home.

Your staircase is at the heart of your home

Our staircase designs are limited only by your imagination. We offer a wide variety of staircase configurations, uniquely designed and created to complement and enhance any space.

Choose from traditional, time honoured designs using the finest seasoned timber to contemporary styles that utilise stainless steel and glass for a spectacular modern effect.

Our skilled and professional designers and craftsmen work with customers from the moment of inception, to the final paint or polish, to get the exact finish they require, for the ultimate in tailor made staircase design.

Traditional staircases

Our passion for the craftsmanship involved in the creation of traditional and bespoke timber staircases shines through in our extensive range of classic designs.

We offer a wide variety of staircase configurations including: traditional closed and cut string, open rise, spiral and helical designs.

Choose from our standard traditional designs or create something entirely bespoke, for a truly customised approach to match your aspirations.

To perfect your dream staircase, we also manufacture a broad range of turned, twisted or fluted balusters and newel posts, and can even match any existing patterns if required.

Modern staircases

Modern staircase design allows the imagination to run free, creating a wonderfully sculptural effect, whilst essentially staying minimalist at heart.

The use of modern materials such as stainless steel and glass allows us to explore new avenues of design, combining the warmth of traditional timber with the stark lines of contemporary materials, to create a truly beautiful effect.

Contemporary staircases

Custom built contemporary staircase designs allow us to demonstrate our ability to innovate and develop alongside current architectural trends.

Utilising the same quality hard woods seen in our traditional staircase designs, our contemporary collections offer the same bespoke craftsmanship and long established production methods as our traditional range, but with the sleeker lines and understated touches associated with the contemporary age.

Harmonise the character of your home

The use of matching timbers and mouldings in your home creates an exceptionally stylish appearance, and this attention to detail allows the quality to shine through and showcase your home to its best advantage.

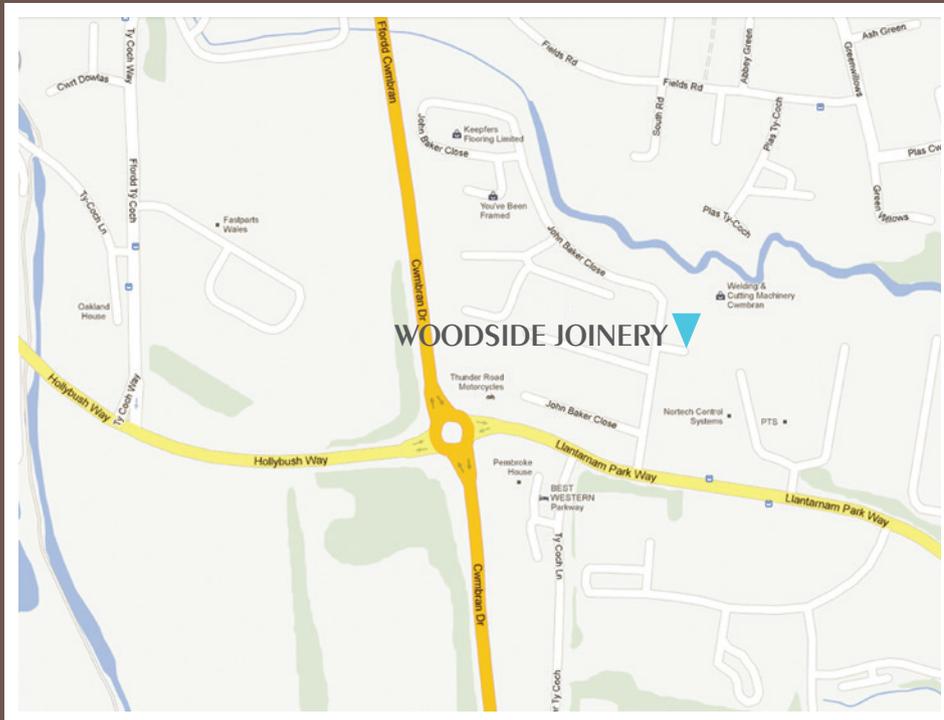

To harmonise the character of your home, we offer a complete joinery service to include internal doors, panelling, architrave, linings, and skirtings, to provide the ultimate bespoke effect.

In addition to our own complete range of hard or softwood designs we also endeavour to match any existing design in your home – an important consideration when refurbishments are required.
